Ideation Phase

Brainstorm & Idea Prioritization

Date	26-09-26
Team ID	23KD1A4230
Project Name	Metro Ticket Generating System in ServiceNow
Maximum Marks	4 Marks

Problem Identification

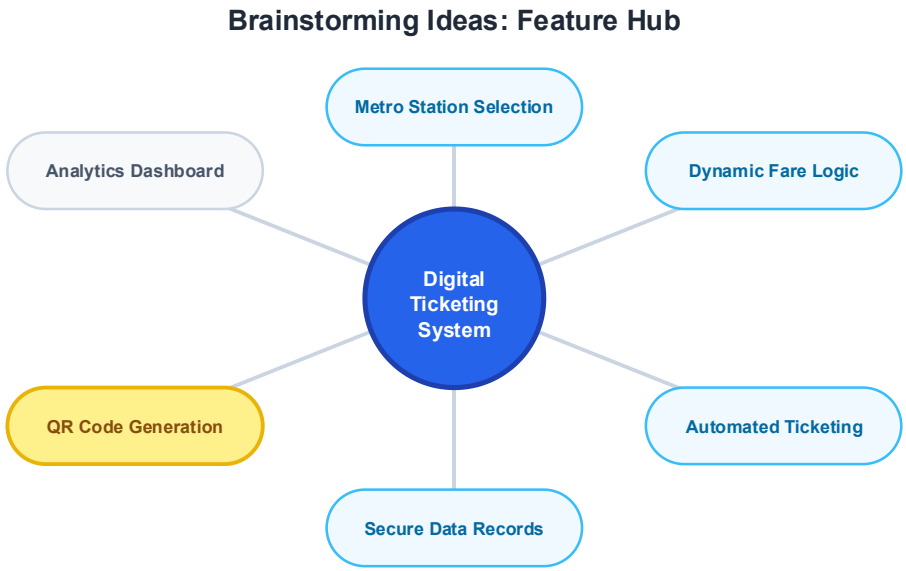

- Long Queues: Traditional ticket counters cause heavy delays during peak hours.
- High Costs: Manual, cash-based transactions require too much staff time and effort.
- Paper Waste: Physical tickets are easily lost by passengers and hurt sustainability goals.
- No Analytics: Offline ticketing prevents the metro from tracking passenger travel trends.

Brainstormed Features

- Digital Booking Form: A simple online catalog for users to select their source and destination.
- Automated Fares: Scripts that instantly calculate ticket prices based on the user's choices.
- QR E-Tickets: Scannable, paperless digital tickets generated right on the user's screen.

- Backend Automation: System workflows that save and manage booking data automatically.

Implementation Map
