Empathy Map Canvas:

An empathy map is a visual tool used to deeply understand a user's behaviours, emotions, and attitudes. It categorizes what users think, feel, hear, see, say, and do to identify core pain points and desired gains.

For the Metro Ticket Generating System, the map focuses on the daily commuter's experience. It highlights their frustration with long queues, fear of losing physical tickets, and desire for fast contactless booking. This insight drives our strategy to prioritize QR code generation and transparent fares for a smoother journey.
