Project Design Phase

Problem - Solution Fit

Date	02-10-26
Team ID	23KD1A4230
Project Name	Metro Ticket Generating System in ServiceNow
Maximum Marks	2 Marks

Problem-Solution Fit Analysis

The Problem-Solution Fit helps us make sure our new digital system actually solves the real problems commuters face. For this project, it looks at how daily travellers act, what slows them down, and how they feel. This ensures our app fixes actual issues, like long ticket lines, rather than just guessing what people need.

By breaking down the commuter's journey such as the stress of waiting in lines and the hassle of paying with exact cash this canvas shows how we can use habits people already have (like scanning QR codes on their phones) to make the app a success. Ultimately, this plan ensures our final product cuts down wait times, shows clear ticket prices, and turns a frustrating chore into a quick and easy paperless experience.
